

Warehouse Management System

Warehouse Management is a proven, advanced WMS Software for manufacturing, distribution and retail enterprises and third-party logistics providers (3PLs) that can be used by enterprising organizations of all sizes. It helps companies maximise product placement strategies, priorities tasks, implement for productivity standards and increase logistics efficiency.

The “right stuff” for end-to-end fulfilment & distribution

Experts estimate that 20% of all orders are filled imperfectly. Thus, the ability to meet customer demand by getting the right products to the right place, at the right time, and in the right condition is an essential competency with bottom-line

Implications. Infor Supply Chain Management’s Warehouse Management System solution enables you to see what inventory is or will be available, organize work and align resources and labor to satisfy customer requirements, and optimize

fulfillment and distribution processes to ensure that products are delivered on time and in full, each and every time. The result: improved supply chain management with end-to-end fulfillment from order inception to delivery.

Infor's WMS helps companies like yours....

- ▶ Receiving inventory 5 to 20%
- ▶ Increase labor productivity 14 to 40%
- ▶ Improve shipping accuracy 2 to 5%
- ▶ Increase inventory accuracy 99+% at location level
- ▶ Boost direct perfect order rates
- ▶ Reduce direct operation cost and increase overall revenue

Infor's WMS Capabilities

Inventory Management.

Multiple units of measure, lot control and catch weights improve inventory accuracy and visibility to offset margin squeeze.

Work and Task Management.

Deep functionality for work order / location grouping into batches and waves optimized productivity.

Labor Management

Forecasting time and attendance assignment scheduling and monitoring and enforcement of standards optimize labor and reduce costs.

Yard Management

Coordination of yard movement with receiving and order fulfillment improves, visibility, productivity and security.

Multiple Inventory Ownership, Billing and Invoicing.

The ability to track multiple inventories, employ multiple business rules and manage billing for multiple customers improves 3PL and distributor efficiency.

Voice-Directed Distribution.

Voice-enabling order selection, replenishments, put-away, transfers and receiving enhances productivity and accuracy.

Cross-Docking.

Flow-thru, trans-shipment and opportunistic process capabilities increase inventory speed and throughput.

Slotting and Optimization.

The ability to arrange SKUs advantageously within a range of pick faces / slots accommodates variable demand.

Value Added Services.

Deferred manufacturing, preparation of store-ready pallets, light assembly and kitting enable customization of products closer to the point of sale.

Infor WMS Capabilities Chart
